Tom H.

This is my third Ravelco install with Chuck and all I am very satisfied with my dealings with him. He is very easy to deal with and the professionalism and

1. By moving the cursor over the photo, an "edit profile picture" button will appear and the user can upload a picture, which will automatically get resized. Like on fb.

2. If there are new leads for the SP there will be a notification box. By clicking on it it will redirect to the "Manage my work" page.

3. By clicking on "Top-Up Now" the SP will get redirected to a page where he/she can purchase credits via PayPal or CC.

1. Here we structure the "Manage my work" page. New Leads, Quotes Sent, Hired, Declined Quotes, Completed.

New Leads: If there a relevant requests for the SP new "leads" will be displayed here. The name of the customer will be shown and the a snippet of the request.

If the SP sends a quote to the customer the "lead" will move to "Quotes Sent". If the customer accepts the quote the "lead" will move to "Hired". If the customer declines the quote it will move to "Declined Quotes". If the SP completed to job the "lead" will move to "Completed".

Not enough info?   Ask Zach a question   **5**

---

1. Here we display the price for this quote. The price depends on the category. We will be able to set a price by category through our admin backend.

2. Here we have to avatar of the business, name of the business owner (personal info), name of the business and the telephone number.
The SP will be able to upload a different photo, this might help to get a better conversion rate.

3. Here the SP can add a price for this job, either a fixed price or price per hour. Underneath that he/she must enter a message, basically a pitch. An attachement can be attached as well.

It should be able that the user can save the message as a template, that way he/she doesn't have to write it from scratch the next time.

4. The SP will get a refund (in that case 9 credits), if the customer doesn't view the quote within 48 hours. As soon as the customer views it, the SP has to pay for it.

We also display how many quotes the customer received already. Only 4 quotes can be send to the customer.

5. Here we display all the information from the request. This info is taking from the form the customer filled in.
The SP will also be able to send a message to the customer, for free.
